DETAILED ACTION

Continued Prosecution Application

The request filed on April 29, 2004 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 08/925,208 is acceptable and a CPA has been established. An action on the CPA follows.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Trutna et al (EP 0524382).

Regarding claim 1,

Figure 3B illustrates an optical oscillator a combination of structural elements for tuning the frequency to sweep across a predetermined bandwidth, where the structural elements include a cavity formed by mirrors, a laser (150) and an acousto-optic tunable filters (AOTF) (#1) and (#2), which provide frequency shift and spectral filtering.

Page 4 line s40-42 discloses tuning the filter and to sweep the predetermined gain bandwidth. Pages 9 and 10 discloses formulas to obtain a rate of change of the tuning, which cause the filter to track the modes to prevent mode hopping.

Regarding claim 2,

Trutna et al illustrates in figure 3B the use of AOTF within the cavity.

Regarding claim 5,

The end mirrors, which form the resonant cavity, provide a Fabry-Perot structure as illustrated in figure 3B.

Allowable Subject Matter

Claims 3,4,6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

None of the cited prior arts alone or in combination disclose the claimed broadband laser having the structure recited in claims 3,4,6-8 for providing a wavelength swept laser having a high average output without discontinuous wavelength tuning.

Claims 9 and 10 are allowed.

The following is an examiner's statement of reasons for allowance:

None of the cited prior arts alone or in combination discloses the claimed sensing apparatus having the recited limitations of independent claims 9 and 10, where an array of environmentally sensitive reflectors combined with a broadband laser provide a wavelength swept laser having a high average output without discontinuous wavelength tuning.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
